CERTIFICATE

ISO/IEC 27001:2022 Information Security Associate - SkillFront | Nov 2025

- Focused on Information Security Management Systems (ISMS) standards and implementation.

Junior Cyber Security - BNSP (Badan Nasional Sertifikasi Profesi) | Sept 2025

- Competencies: Access Control Management, Log Analysis, Information Security Policy Implementation, and Secure Electronic Transactions.

TECHNICAL SKILLS

Cybersecurity & Governance

- **Standards & Compliance**: ISO/IEC 27001:2022 (Information Security Management Systems).
- **Technical Competencies**: Access Control Management, Vulnerability Assessment (OWASP Top 10), Log Analysis, and Information Security Policy Implementation.
- **Tools**: Burp Suite, Nmap, and Linux security tools.

Web Development

- **Frontend:** React.js, Next.js, JavaScript, and Tailwind CSS.
- **Backend:** Node.js, PHP, Java, and C++.
- **Database:** MySQL and MongoDB.

Tools & Productivity

- **Design & Prototyping:** Figma, Canva, and Draw.io.
- **Collaboration:** Google Workspace (Advanced Spreadsheet tracking), Microsoft Office, and Notion.

PROJECT AND ACHIEVEMENTS

- **CU × UTP 2025 Hackathon - First Runner-Up**
  Pennywise | Financial Literacy Web App
  Make prototype using Figma and developed using **React, Next.js, Node.js, and Python** to empower users with smart saving and investing habits.
- **Bank Indonesia & OJK Hackathon - Team Leader**
  Dompetia | Financial Management Prototype
  Led team to build Dompetia, a data-driven financial management website prototype predicting users' long-term financial stability, using **HTML, CSS, and JavaScript** as core technologies.
- **BudayaGo - Team Leader**
  Kawi | Cultural Preservation App
  Led a cross-functional team to develop a gamified mobile application prototype focused on preserving Indonesian culture through interactive learning.
- **PortSwigger Lab Report - Penetration Testing**
  PortSwigger Medium Report
  Performed supervised, lab-based vulnerability assessments on intentionally vulnerable web apps (OWASP/access-control labs). Documented findings and remediation recommendations using Burp Suite, Nmap, and Linux tools.
